

Carrot Dangling Script

You can do live, or leave on their voicemail:

Hey John! It's Steve, we talked about starting your own business with LegalShield a few weeks ago. Well I've got a deal you absolutely won't be able to turn down. You know the beauty of this business is that you can build a team of associates marketing our services across the country and get paid for every sale THEY make, right?! Well I have a few people filling out their applications to get started tonight... so I wanted to let you sign up today and beat them to the table... and I will put them UNDER YOU! This means you can earn off their efforts! I can't hold them off, they are excited to get started making money. So I need to hear back from you before today ends if you don't want to miss the lifetime of income these people can generate for you. Call me ASAP!!
